**List view Builder:**

```
import 'package:flutter/material.dart';
class listViewBuilder extends StatefulWidget {
@override
  _listViewBuilderState createState() => _listViewBuilderState();
}
class _listViewBuilderState extends State<listViewBuilder> {
@override
  List listitem = [];
  void initState() {
    super.initState();
    listitem = List.generate(5, (index) => 'Item No. $index');
  }
@override
  Widget build(BuildContext context) {
    return Scaffold(
      backgroundColor: Colors.pinkAccent,
      appBar: AppBar(
        title: const Text(' List View',textAlign: TextAlign.center,
      ),
    ),
    body: ListView.builder(
      itemCount: listitem.length,
      itemBuilder: (BuildContext context, int index) {
        return ListTile(
          title: Text(listitem[index]),
        );
      },
    );
  }
}
```
